Gustavo Cordeiro, CDSP

Talent Acquisition @ VISA | Specializing in hiring Machine Learning and Data Engineering | Hiring in San Francisco Bay Area, Austin TX, and Atlanta GA

Sandy, Utah, United States

Summary

Being a first-generation immigrant and college graduate, I've always enjoyed meeting new people and getting to know their unique perspectives and experiences. As my studies in Business Administration concluded, the opportunity to specialize in networking with technology professionals fell in my lap and I've grown exponentially since! Having old school immigrant parents while growing up during the tech boom of the past 20 years I've been amazed by the development of the internet and the countless innovations associated. I enjoy pairing my passion of meeting people with the business education and experience in technology both professional and personal I've gained over the years.

Experience

Visa

Talent Acquisition Specialist

December 2021 - Present (3 years 8 months)

As a Sourcer specializing in Data Science at Visa, my role primarily involves identifying, attracting, and screening potential candidates for various data-centric roles within the company, including supporting the recruitment for the Visa Research organization and the overall Data platform. I leverage various platforms and strategies, such as social media, job boards, and networking events, to find highly qualified individuals in the field of data science. I understand the specific requirements of each role, conduct preliminary interviews, and maintain a pipeline of potential candidates. Working closely with hiring managers and HR teams, I ensure that the recruitment process is efficient and effective, thereby attracting top talent in data science to contribute to Visa's research, development and data platform efforts.

Andiamo Partners

Technology Talent Acquisition Specialist
